

SOLO PLANT · ORCHID CARE CARD

Cambria

Not a single species but a family of hybrids. Because it is bred by crossing different genera whose parents come from all over the world, it does not occur in nature; instead it offers countless colours, flower sizes and shapes.

ORIGIN
A hybrid group with parent species from around the world

AVAILABILITY
All year round

FLOWERING TIME
4–8 weeks

TEMPERATURE
15–25°C

A note from Solo Plant Follow your orchid's needs, not the calendar. Check the moisture of the growing medium before watering, and never leave water standing in the outer pot.

Care at a glance.

Position & light
A bright spot out of direct sun, not too close to a radiator.

Feeding
1× / month (April–October)

Optional; you can give orchid food once a month from April to October.

Watering
1× / week

Once a week, soak the inner pot for about 10 minutes and drain it well.

Reblooming
Cut the finished stem and keep watering weekly. Until new buds appear, keep your orchid somewhere cooler (16–18°C) with plenty of light.

Temperature
25°
15°

15–25°C.

Repotting
When it has outgrown its pot, you can repot it in orchid medium.
