

SOLO PLANT · ORCHID CARE CARD

Dendrobium nobile

Bamboo orchid

Upright, bamboo-like canes with clusters of flowers opening at every leaf joint. Dendrobium nobile comes from Asia, especially Thailand and Taiwan.

ORIGIN
Asia, especially Thailand and Taiwan

AVAILABILITY
All year round

FLOWERING TIME
6–8 weeks

TEMPERATURE
15–25°C

A note from Solo Plant Follow your orchid's needs, not the calendar. Check the moisture of the growing medium before watering, and never leave water standing in the outer pot.

Care at a glance.

Position & light
A bright spot out of direct sun, not too close to a radiator.

Feeding
1× / month

It flowers without feeding; monthly orchid food brings out its best.

Watering
1× / week

Once a week, give about 100 ml of water or soak the inner pot for around 10 minutes. Drain it well before returning it to its decorative pot.

Reblooming
It can produce new flower stems. When a new stem reaches about half the length of the old one, the spent stem can be removed. Meanwhile, water a little less and keep the plant somewhere cooler.

Temperature
25°
15°

15–25°C.

Repotting
If the roots are healthy, repot every 3–4 years in orchid medium. Trim away any soft or rotten roots and replant in the same pot.
