

SOLO PLANT · ORCHID CARE CARD

Miltonia

Pansy orchid

With its flat, face-like flowers it recalls a pansy. It lives as an epiphyte on moss-covered branches at the edges and in the clearings of mountain forests in the Andes, from Colombia to Peru and Ecuador.

ORIGIN
The Andes, from Colombia to Peru and Ecuador

AVAILABILITY
All year round; most abundant in spring

FLOWERING TIME
2–4 weeks

TEMPERATURE
18–24°C

A note from Solo Plant Follow your orchid's needs, not the calendar. Check the moisture of the growing medium before watering, and never leave water standing in the outer pot.

Care at a glance.

Position & light
A bright spot out of direct sun, away from draughts and damp corners.

Feeding
1× / month

Optional; you can give orchid food once a month.

Watering
1–2× / week

Once or twice a week, soak the inner pot for about 10 minutes and drain it well.

Reblooming
When flowering ends, cut the flower stems off completely. The plant makes new shoots, and once these mature, new flower stems appear.

Temperature
24°
18°

18–24°C.

Repotting
Repot every year, ideally after flowering, in orchid medium.
