

SOLO PLANT · ORCHID CARE CARD

Oncidium

Dancing lady orchid

It grows on trees and in rock crevices in the forests of Central and South America. Best known in yellow and russet tones, it also comes in colours from white to brown.

ORIGIN
Central and South America

AVAILABILITY
All year round

FLOWERING TIME
5–8 weeks

TEMPERATURE
15–25°C

A note from Solo Plant Follow your orchid's needs, not the calendar. Check the moisture of the growing medium before watering, and never leave water standing in the outer pot.

Care at a glance.

Position & light
Choose a bright spot, out of direct summer sun.

Feeding
2× / month (April–October)

Optional; you can give orchid food twice a month from April to October.

Watering
1× / week

Once a week, give about 100 ml of water or soak the inner pot for around 10 minutes; drain it well.

Reblooming
When flowering ends, cut the flower stems off completely to make room for new ones. It usually flowers again within 9–12 months.

Temperature
25°
15°

15–25°C.

Repotting
Repot only when it gets too big, and after flowering.
