

SOLO PLANT · ORCHID CARE CARD

Zygopetalum

Native to South America, it grows on tree stumps, on rocks and on the ground among fallen leaves. It flowers in shades of blue, red, purple and white, and some varieties give off a lovely scent while in bloom.

ORIGIN
South America

AVAILABILITY
All year round

FLOWERING TIME
4–6 weeks

TEMPERATURE
15–25°C

A note from Solo Plant Follow your orchid's needs, not the calendar. Check the moisture of the growing medium before watering, and never leave water standing in the outer pot.

Care at a glance.

Position & light
A bright spot out of direct sun. Keep it away from ripening fruit.

Feeding
2× / month (February–October)

Optional; you can give orchid food twice a month from February to October.

Watering
1× / week

Once a week, dip the inner pot in water for about 3 minutes and drain it well.

Reblooming
Cut the finished stem right at its base. The orchid sends up a new flower stem from a new shoot, usually within 8–12 months.

Temperature
25°
15°

15–25°C.

Repotting
Repotting every three years is important; use an orchid-specific medium.
